

CS4500 Weekly Management Report

Team 9

Team Intuitive Intel

9/23/2022

Accomplishments

Figured out how to correctly get the information we need to support our comments page (Garrett)

Refactored button logic to a single method, will help bug fix and make adding new buttons much easier (Johnny)

Fixed a few bugs and added new helpers to further consolidate button logic (Johnny)

Added button to set skill level (Johnny)

Resolved React upstream dependencies and made sure it does not happen again on local development server (Nanda)

Reworked on some endpoints to talk to database on CORS side (Nanda)

Create the comments sections for each thread created, as of now I have tried multiple ways of doing it but it was not very functional, looking into other options or doing it from scratch which would take good chunk of time (Nanda)

More or less confirmed that AWS CodeCommit will work for our React app and just need to make sure it isn't too expensive. (Alec)

Added queries for all functionality of UI. Not final version with safety measures but functional (Johnny)

Goals & Priorities

(List short- and long-term goals in decreasing order of importance; state who is primary responsible and when due)

Long Term -

Make UI fully interact with database (Johnny - October 15)

Continue altering and creating queries between the React website and postgres db. (Garrett - October 30)

Add more webpages to view game tips on the forum app (Nanda – October 30)

Setup all endpoints on CORS/Express and structure the JSON data to and from the backend to frontend (Nanda – Oct 30/Ongoing)

Support the feature of user created tips in the database (Alec – Oct 15)

Finalize UI and create UI for uploading a tip (Johnny)

Short Term -

Make basic UI for adding a tip (#3 Johnny - September 30)

Add a color theme to each comment box using CSS and apply that to the MMaterial UI components (It is not directly supported to add custom modifications, writing a separate .css file to make it work) (#1 Nanda - September 25)

Work on the navigation bar which contains the username, profile picture and other details for the user (#2 Nanda – September 29)

Pull the user information from the Google Authentication used for the App bar to display the profile picture for each comments posted on respective thread (#3 Nanda - September 27)

Make a comments field in the component to add new comments to each thread if the user already signed up (do conditional rendering) (#4 Nanda October 8th)

Get the React fully hosted with a plan to keep the git repo hosted in sync with the pushes made (#1 Alec – September 30)

Assist Nanda in upgrading our forum website's UI (#1 Garrett - September 30)

Needs

(List any help you need from upper management – specify whether TCH or sponsor)

We don't need any help at this time.
