

CS4500 Weekly Management Report

Team 9

Team Intuitive Intel

9/9/2022

Accomplishments

Added in a login utilizing Google's OAuth 2.0 authentication. (Garrett)

Adjusted aspects of react app to better reflect the new login functionality. (Garrett)

Added in query to allow Nanda to implement individual thread comments. (Garrett)

Finished setting up database tables (Johnny)

Resolved React upstream dependencies and made sure it does not happen again on local development server (Nanda)

Reworked on some endpoints to talk to database on CORS side (Nanda)

Added more fields to login page and made it look pretty but got replaced with google login later (Nanda)

Got a basic test application running on an ec2 (Alec)

Found numerous viable options for synchronously hosting git repositories on an ec2 (Alec)

Goals & Priorities

(List short- and long-term goals in decreasing order of importance; state who is primary responsible and

when due)

Long Term -

Make UI fully interact with database (Johnny - October 15)

Continue altering and creating queries between the React website and postgres db. (Garrett - October 30)

Add more webpages to view game tips on the forum app (Nanda – October 30)

Setup all endpoints on CORS/Express and structure the JSON data to and from the backend to frontend (Nanda – Oct 30/Ongoing)

Support the feature of user created tips in the database (Alec – Oct 15)

Short Term -

P1 - Add support for multiple games (#1 Johnny – September 11)

B2 - Database to store tips on AWS focused on highly performant reads (#2 Johnny – September 11)

W3 - Track specific users in database (#1 Garrett – September 15)

Implement users on the postgres db utilizing google users instead of built in users. (#2 Garrett – September 15)

Make basic UI for adding a tip (#3 Johnny - September 16)

Backup Nanda on any SQL queries he may need for developing comment pages. (#3 Garrett – September 14)

Create the comments sections for each thread created, as of now I have tried multiple ways of doing it but it was not very functional, looking into other options or doing it from scratch which would take good chunk of time (#1 Nanda – September 20)

Work on the navigation bar which contains the username, profile picture and other details for the user (#2 Nanda – September 16)

Get the React fully hosted with a plan to keep the git repo hosted in sync with the pushes made (#1 Alec – September 16)

P2 - Users can set their skill level per game (#3 Johnny – September 18)

Needs

(List any help you need from upper management – specify whether TCH or sponsor)

We don't need any help at this time.
